

Unleash Your
Business
Potential!

BUSINESS SOLUTIONS

Small & Medium Business • Enterprise

HUMAN RESOURCES MANAGEMENT

HUMAN RESOURCES CONSULTING

We help your organization make strategic HR decisions to create a diverse and inclusive environment, remain compliant within your industry and provide training to develop your current and future leaders so your organization can face the future with confidence.

DOCUMENT MANAGEMENT

Secure Document Management (SDM) simplifies document management across your entire organization. It saves time and money by preventing errors, reducing risk and improving visibility while streamlining workflows and audits.

PAYROLL MANAGEMENT

Our payroll and HR software works better because everything works together. With just one login and one password, employees enter and manage their own HR and payroll data in a single, easy-to-use software. All information entered flows seamlessly from one section to the next, no re-key required.

BRAND MANAGEMENT

Our methodology and processes we have developed are based on our years of experience and strategic analytics. Developing a brand strategy starts with a multi-dimensional approach to fully understand and identify the “best-in-class” options for development.

RISK MANAGEMENT

Our services are based on the ISO 27005 risk assessment guidelines and methodology that aligns to the five main stages of a risk assessment. We strive to meet assessment requirements of all major standards, such as ISO, SOC2, PCI, and HIPAA.

BENEFITS ADMINISTRATION

Our benefits specialists handle all aspects of your companies benefits plan, from enrollment to transfer. We handle all items including your ACA and COBRA compliance. We work with your existing program and augment your HR teams to increase total efficiency.

Working with a consultant who understands my business is hard to find, the team at Brand Global has the knowledge and experience in so many industries.
